

**50-LB
CAPACITY**

Logistic Strap Storage Bag

While transporting cargo, you're bound to have loose items hanging around. These loose articles can present a safety hazard in the event of an accident, and disorganized items can cause chaos; ultimately reducing efficiency.

Lift-All's Logistic Strap Storage Bag is exactly what you need for storing cargo accessories such as ratchet straps, small equipment or tools, as well as personal items such as jackets, hats, and gloves. The bag is designed for use in van interiors equipped with horizontal E-Style Logistic track.

The heavy-duty bag is constructed of PVC Coated Polyester (16oz, .02" thick), making it resistant to water, dirt, oil, salt, mildew and UV rays. It attaches to the track using standard Series E-Spring loaded fittings that are sewn right into the bag. The bag is 14" high by 24" wide and is rated to a maximum weight capacity of 50-lbs.

FEATURES AND BENEFITS
