Lift-All

Manual and Lever

Chain Hoists

Lift-All hoists are perfect for a low-headroom lift. These economical, durable, and lightweight hoists are excellent options for a variety of lifting applications. The fully enclosed gears are protected from contamination. Powder-coated and plated finishes on exposed components protect the hoists from corrosion. All gears and shafts run on caged roller bearings for smooth operation and long life (excludes mini pullers). The self-adjusting Weston style mechanical load brake never requires adjustment. The top hook mounting aids in rigging and helps ensure straight line loading between hooks.

The Lever Chain Hoist can be used with one-hand operation and set-up. Featuring a non-slip rubber grip and 360° lever rotation, this hoist requires minimal space to operate in any orientation. Drop forged alloy hooks are designed to stretch before chain failure when overloaded.

FEATURES AND BENEFITS

- Economical and easy to operate.
- Powder-coated or plated housing and hooks protect from corrosion.
- Fully enclosed gearing protects from contamination.
- Enclosed, self-adjusting Weston style mechanical load brake.
- The lever chain hoist has easy one-hand operation and set-up and operates in any orientation.
- Available Lifts:
 - Manual hoist - 10', 20', and 30'.
 - Lever hoist - 5', 10', and 20'.
 - Mini hoist - 5' and 10'.
- Capacities ranging from ¼ ton to 10 ton (with additional capacities available upon request).

All manual & lever hoists meet ASME/ANSI B30 and NASA-STD-8719.9 standards.
