

Lift-All[®]
PRODUCTS FOR BETTER LIFTING

INSPECTION & SAFETY SERVICES

The Slings You Need With The Support You Want

Lift-All[®] Company will bring factory trained employees to your site to perform Sling Inspection and/or Safety Seminars.

SLING INSPECTIONS

OSHA regulations require that all chain slings receive a thorough inspection at least once per year by a competent person. You now have the opportunity to receive a thorough, documented sling inspection performed by a factory trained *Lift-All* representative on all of your slings. Chain slings, wire rope slings, web slings, round slings and wire mesh slings can be inspected in one survey by a representative from the only company that makes them all - *Lift-All* Company.

The Inspection Procedure

- Each sling is individually recorded and reported by location, serial number (if available), size, type, reach and condition.
- If desired, we will affix warning tags to those slings found to be damaged.
- A typewritten Sling Survey Report will be submitted to you for your records, showing the above information along with any recommendations we may have for improving your sling life and lifting safety.
- If you wish to repair or replace any of the damaged slings, we will provide cost estimates to do so.

Sling Inspections not only help to ensure safe lifting equipment but also increase employee awareness of sling safety, creating a safer workplace for all.

Contact your distributor of Industrial supplies to arrange for your Sling Inspection today.

SAFETY SEMINARS

Lift-All Company offers a "Safety in Lifting" seminar. A *Lift-All* representative will come to your location with the *Lift-All* produced video "Safety in Lifting" and discuss sling information that is appropriate to your employees.

Safety in Lifting topics covered are:

1. Sling Categories.
2. Planning a safe lift.
3. Inspection procedures for slings.
4. Repair information.
5. Care and operating practices.

In addition to the basic information covered in the video, the seminar also provides a chance for your employees to ask questions concerning the use of slings in their job. Are they using the best sling for their application? How could they make their slings last longer?

The seminar offers you the opportunity to improve your employee's knowledge of slings and stimulate their awareness of sling and lifting safety.

Contact your distributor of Industrial supplies to arrange for your *Safety in Lifting* seminar.
