

OSHA regulations require that all chain slings receive a thorough inspection at least once per year by a competent person. You now have the opportunity to have a thorough documented inspection performed by a factory trained Lift-All representative. Chain slings, wire rope slings, web slings, Roundslings and wire mesh slings all can be inspected in one survey by a representative from the only company that makes them all – Lift-All!

The Inspection Procedure

Each sling is individually recorded and reported by location, size, type, reach, serial number (if available), and condition.

If desired, we will affix warning tags to those slings found to be damaged,

A typewritten sling survey report will be submitted to you for your records, showing the above information, along with any recommendations we may have for improving your sling lift and lifting safety.

If you wish to repair or replace any of the damaged slings, we will provide cost estimates to do so.

Sling inspections not only help to insure safe lifting equipment but also increase employee awareness of sling safety, creating a safer workplace for all.

Also available – Safety in Lifting seminar.

Call now to arrange your sling inspection at 800-909-1964.
