

Lift-All Company, North America's leader in sling technology, offers a *Safety in Lifting* seminar to help educate your employees about sling and proper lifting procedures.

A Lift-All representative will come to your location with a 22-minute video produced by Lift-All Company, titled *Safety in Lifting*. He will discuss sling information that relates to your unique needs and employees.

Safety in Lifting topics covered are:

1. Sling Categories.
2. Planning a safe lift.
3. Inspection procedures for slings.
4. Repair information.
5. Care and operating practices.

In addition to the basic information covered in the video, the seminar provides a chance for your employees to ask questions concerning the use of slings in their job such as:

Are they using the best sling for their application?

How could they make their slings last longer?

Am I using the sling correctly?

How do I store the sling?

The seminar offers you the opportunity to improve your employee's knowledge of slings and stimulate their awareness of sling and lifting safety.

Call now to arrange for your *Safety in Lifting* seminar!
